Exciting Color SHINE

For the most spectacular French manicure ever!

California Chemical Specialties (CCS)

introduces unique, patented cosmetic polymers with white so bright they will give you the chills. The Arctic Collection™ is infused with illuminants to catch the ambient light and shine on the fingertips. We have applied our revolutionary Arctic White™ technology to an extended color line that will assure you of the most spectacular French manicure ever. No yellowing, no streaking. The Arctic Collection produces a perfect, long-lasting French manicure every time.

A name you trust

You know CCS and you know our reputation for quality, innovation and top-flight customer services. So you can be sure that when we say The Arctic Collection will thrill your nail techs and captivate their clients, we mean it!

Advanced Nail Technology

The Arctic Collection™ is available in four substrate compositions as well as a host of exciting colors:

Product Code	Description					
Y 383	Traditional set designed for every level of expertise and ease of application. Provides a longer sculpting time than fast set powders and an efficient cure.					
	Clear 0000	White 2555	Cover Pink 2554	Soft Pink 2563		
	Natural 2552	Soft White 2562	Transparent Pink 2553			
Y 384	The fastest set powder, absorbing liquid faster to create quick gelling systems.					
	Clear 0000	White 2556	Cover Pink 2583	Soft Pink 2585		
	Natural 2581	Soft White 2582	Transparent Pink 2584			
Y 385	A fast set polymer ideal for quick sculpts and easy product control.					
	Clear 0000	White 2557	Cover Pink 2567	Soft Pink 2566		
	Natural 2565	Soft White 2564	Transparent Pink 2568			
Y 387	Medium set powder with a slightly longer sculpting time than the Y 385					
	Clear 0000	White 2558	Cover Pink 2573	Soft Pink 2571		
	Natural 2570	Soft White 2569	Transparent Pink 2572			
P 702 0000	A low odor, premium violet monomer that works with every Arctic White powder. Specially blended to enhance the optical properties of the Arctic White beads.					

Ordering and Shipping Information

All materials are shipped in bulk. The standard package size for CCS powders is a 200-pound fiber drum. For nail art powders such as Arctic White, the minimum order is 5 pounds. For an additional charge, special packaging is available in 5-, 10-, and 25-pound plastic pails or 50- and 100-pound fiber drums.

Custom packaging with your own proprietary brand labeling is now available from our subsidiary, EssPac. Contact your Customer Service Representative for more information.

All sales are subject to our Standard Terms and Conditions of Sale. Consult your Customer Service Representative for additional information and details.

Credit Card Orders

For all orders of 999 pounds or less, you can use VISA or MasterCard to charge your purchase!

All data presented herein are based on information available to and believed to be correct. No warranty, expressed or implied, is made regarding the results from the use of any data or material of our manufacture. The use of information herein is not intended to encourage violation of any existing patents.

CCS offers its products in bulk for manufacturing, processing, or repackaging only. The purchaser's finished product for end-use application, based on these components, may require compliance with applicable product regulations, including those promulgated by the United States Food & Drug Administration (See General Conditions of Sale). If you have not received, or if you require literature, Material Safety Data Sheets, and/or assistance regarding the proper use and handling of our products, these are available on request.
